

## About Seafood Next

Seafood Next is an international competence program for professionals new to the seafood industry. The one-year program is open for anyone that want to further develop their insight and knowledge of the global seafood industry, and the program will attract candidates with different expertise, education and positions.

Seafood Next focus on sustainable growth and innovation throughout the seafood value chain. Through the program you will be meeting leading actors in the seafood industry, visiting fishfarms and hatcheries and getting insight about the most important megatrends in the industry. The modules serve as a meeting place for exchange of experience and together with social activities you will build an important network for your future career in the industry. In addition to the four physical modules, you will gain access to Blue Planet Academy, a leading digital e-learning platform within aquaculture.

## Dates

The program is module-based and consists of 4 modules of 2/3 days:

|          | Theme               | Date               | Place     |
